51 E. Main St.  
American Fork, UT 84003

AF City Resident,

You are receiving this notice because your property is considered an atypical installation site for our Pressurized Irrigation (PI) Meter project. In your situation some additional time and work may be required to successfully install your PI meter.

Most PI meter installations are installed relatively quick and easy without issues or disruption to the resident. However, there is a handful of homes and/or neighborhoods with existing PI lines that were not originally installed according to current city standards. These atypical PI lines often require additional installation time and may require a larger area than just the utility box to be excavated so the city can remove lines and/or adjust equipment to allow for the meter. The additional work required to bring these systems up to standard and reinstall any affected private infrastructure will come at no additional cost to the property owner. In some cases, full landscaping restoration (sod) may be completed up to a couple weeks after the meter install to allow for the settling of backfill. Residents will still be responsible for any items installed within the city's PI box that don't belong there.

While not the preferred situation, atypical situations where significant additional work is needed may also require a shutdown of the irrigation line on the street in order to remove the meter box, cut the line, and restore all of the internal piping. The city will do their best to warn you and minimize the time water is shutoff.

You are encouraged to contact our Public Works Department if you have any questions or would like more detail. Their contact information is below.

Public Works Department  
275 E 200 N, AF, UT 84003  
801-763-3060  
[AFPW@americanfork.gov](mailto:AFPW@americanfork.gov)

Additionally, updates to the PI meter project can be found on the City's website at [americanfork.gov/PImeters](http://americanfork.gov/PImeters).

Thank you for your patience and understanding as this State mandated project moves forward.

Sincerely,

American Fork City
